

## PRESS RELEASE

FOR IMMEDIATE RELEASE

Johnstown, PA

April 10, 2008

### **Gleason ESP Saves Environment *and* Reduces Costs**

Gleason Technology has rapidly become the industry leader in premises inspection with the developmental Gleason ESP. Gleason ESP is a web based, patented inspection system that produces electronic record keeping to document walk around inspection tours by assigned staff.

Gleason ESP (U.S. patent 6,078,255) has been successfully installed in 600 retail supermarkets and warehouse locations throughout the United States and Canada

***Gleason ESP is the only environmentally friendly inspection system on the market today...***

Gleason ESP saves reams of paper and energy by providing this vital function as environmentally friendly as possible. Not only is Gleason ESP cost effective, but it is energy effective as well. For Example ESP Paperless Inspection Logs Saves

- 30,000 pages of paper a day
- 600 Stores use ESP
- 1 5 page inspection log per day
- 365 Days per year

Gleason ESP's interactive database provides a paperless way to log store inspections and keep a record of store conditions. "Gleason ESP is not only environmentally friendly, but our data also proves that it keeps stores safer, cleaner and more immune from lawsuits and litigation than stores who rely on an outdated paper log system" states President Robert A. "Rooney" Gleason.

*Gleason Technology was founded with the mission of providing its clients with cutting edge applied technology that will permanently improve safety, employee behaviors, facility cleanliness, and operational consistency.
