***For Immediate Release
December 1, 2005***

Peirce College in Philadelphia, PA has recently installed the GleasonESP premises inspection system to be used to document regularly scheduled inspections being completed by school security. The College will utilize the various reports that are created by the GleasonESP system to more efficiently manage security inspections taking place on the campus.

The GleasonESP system uses a secured password protected Internet based database to return reports to the various schools. GleasonESP is also an imperative tool for those at the administration level managing security personnel. The implementation of this revolutionary system promises to streamline an otherwise burdensome process, create valid documentation, and secure the safety of the campus and its premises. "Gleason ESP has revolutionized the way we manage campus safety and security. We now offer a safer environment for our students, and our staff, which ultimately makes everyone more productive," states Jim Mergioti, Vice President of Peirce College.

Gleason Technology, Inc. was founded with the mission of providing its clients with cutting edge applied technology that will permanently improve safety, employee behaviors, facility cleanliness, and operational consistency. Gleason Technology is the sister company to Gleason Insurance, which is headquartered in Johnstown, Pa., and has over 80 years of experience in providing the highest level of risk management, insurance, and safety services to a vast array of clients.
